This project was developed by Nancy Edwards of Creative Spaces, a member of the Regional Chronic Disease Coalition (RCDC) of Morris and Somerset Counties, as an alternative way to educate the community about skin damage and cancer caused by exposure to the sun. Lucille Talbot of RCDC provided the educational component. XACT Studios has been instrumental in helping with the judging and printing aspects. Various partners provided exhibit space to highlight the RAYS Art Project. The Morris/Somerset Regional Chronic Disease Coalition (RCDC) is made possible by a grant from the New Jersey Department of Health and Senior Services' Office of Cancer Control and Prevention to the Somerset County Department of Health. For more information on the Coalition, to become a member or learn more about available educational and screening resources contact Lucille Y-Talbot, RCDC Public Health Coordinator, 908-203-6077.
