

Having grown up in the Detroit metropolitan area during the late 1950's and 60's, I've always been captivated and intrigued with the cars of that time. I can vividly remember the sounds of the powerful rumbling engines, the screeching tires and the stunning styling and design features of the cars that once cruised the highways around the Motor City. Looking back, I always knew a time would come when I would be in a position to one day purchase the "classic" car of my dreams.....a 1960 Chevrolet Corvette.

In August of 2000, after nearly two years of searching, I purchased this 1960 Corvette at an RM Classic Car auction that was held at the Michigan State Fair Grounds in Detroit, Michigan. It was exactly the car I'd been wanting for those many years. This beauty is powered by the base 230 horsepower 283 cubic-inch V8 and is backed up by Chevrolet's cast iron PowerGlide transmission. The car appeared to look brand new. At the time of purchase, the RM Classic Car Auction Company provided me written documentation stating the car had received a "body off" restoration.

During the eleven years of ownership, I've meticulously cared for the car. I've put just under 6,000 miles on it in the last eleven years. It has never been in an accident while I've owned it. All routine maintenance work has always been completed in timely manner. Recently, the carburetor has been rebuilt, the engine tuned up, new carpeting has been installed and the brakes have been completely overhauled. The body, paint and chrome are show quality as is the rest of the car. I hope to find a buyer who will enjoy the car as much as I have.
