

# HYBRID

# WRX 01-05 INSTALLATION

**NOTE:**  
Picture may be different than actual product!  
This is a reference guide only!

**Step 1**

**Remove the front bar and the reinforcement bar.**

**Step 2**

**Remove the standard top mount intercooler and brackets etc...**

**Step 3**

**Remove cold air flow box and disconnected the Air Flow Meter.**

**Step 4**  
Put cable behind Bracket!

*NOTE: Place wire (Cable & plug) behind bracket!!!!!!!!!!!!*

**Step 5**  
~Install Piping~  
**\*Attach Air Flow Meter Pipe**  
(Note: Attach Air Flow Meter Back to pipe)

**\* Assemble cold air intake pipe to the Air Flow Meter Pipe**

**\* Connect Air Pod to the cold air intake pipe as seen in the picture**

**\* Attach Top Driver Side Pipe to the throttle as seen in the picture.**

**(NOTE: Be sure to mount bracket securely.)**

**\* Attach Bottom Driver Side Pipe to the bottom of the Top Driver Side Pipe, which runs from the throttle.**

**\* Attach Top Driver Side pipe to turbo outlet.**

**\* Attach Middle passenger side pipe to the bottom of the Top Driver Side Pipe, which runs from the turbo.**

**\*Attach Bottom Passenger Side Pipe to the bottom of the Middle Pipe.**

**\*Trim plastic guard tray enough so that it doesn't interfere with the intercooler or it's piping.**

**\*Mount the Hybrid Intercooler Brackets & the Hybrid Intercooler into position and connect the piping**

**\*Trim front bar back just enough to avoid it rubbing on the Hybrid Intercooler and it's piping.**

**\*Double check all the piping and clamps to make sure everything is tightened and correctly into position.**

# FINISHED!
