

Let's load a Rapid Mag, Step by step!

1.

Being right handed, hold the mag in your left hand. With the clear lid toward you and the openings at the 12 o'clock position

2.

Now rotate the clear lid in the direction of the arrow(counter-clockwise). Keep on turning the lid until it stops. You should be able see through the oval port in the cover, and see the hole in the back of the mag line-up!

3.

Using your middle finger tip. to hold the lid back..Now place your index finger over the hole in the back and drop a pellet through the opening in the lid. Now with a pellet in the "first" position, it will hold the pellet indexing "Star" in place.

4.

There will be no spring tension on the lid now. You can now rotate the lid, in a clockwise direction and drop a pellet in each slot of the star as you pass it!!

5.

Now after you have placed the last pellet in the mag, just keep rotating the lid clockwise and lock it on the detent!

6.

You are ready to go Shooting!!
